Day 14 - 29/11/2022

Q. Write a program to reverse a given number

main.py

```python
num = int(input("Enter a number: "))
rev = 0

while (num > 0):
    rem = num % 10
    rev = (rev * 10) + rem
    num = num // 10

print("Reverse of the input number is",rev)
```

output

```
PS E:\Panku\Python>  e:; cd 'e:\Panku\Python'; &
ython.python-2022.16.1\pythonFiles\lib\python\deb
Enter a number: 12345
Reverse of the input number is 54321
PS E:\Panku\Python> []
```
